Syllabus

Course: Differentiation and Assessment for Middle School
Presenter: Rick Wormeli
Credits: 3

Course Overview

In this energetic, eight-unit course, Rick Wormeli brings his extensive expertise and boundless energy to the vital discussion of creating 21st century classrooms that allow for the success of each individual student. He makes a strong argument for the necessity of creating differentiated instruction and assessment in our middle schools and indeed, throughout the educational process.

Wormeli begins with a critical question to educators; how can we change the culture of our schools? He asserts that the traditional lecture and assessment methods that assume all kids learn the same way are not correct. He presents evidence of the value of knowing the students well and learning how to differentiate instruction to accommodate their needs. He stresses that in the classroom “fair is not necessarily equal.” When we differentiate instruction and assessment— we are taking this into account.

In subsequent units Mr. Wormeli presents his case for the differentiated classroom and assessment techniques. Using current research by noted experts in the field, such as Rick Stiggins, Steven Covey, Carol Ann Tomlinson and Howard Gardner, he introduces educators to the essential techniques in creating differentiated learning environments and the rationale for implementing them.

Through citing of the essential literature and his own expertise and anecdotal experiences as a teacher, Mr. Wormeli challenges educators to have the courage to change their mindsets in order to make the changes necessary for their students’ success.

Course Objectives

After completing this course, educators will know:

- The importance of knowing each student’s learning style and readiness
- The particular nature of the adolescent brain and how it implements memory and learning
- The value of creating a classroom which uses differentiated instruction and assessment techniques
- Strategies for evaluating grading systems and instructional design
- The authentic reasons for grading and assessment and the value of consistent feedback

Student Learning Outcomes

After completing this course, educators will apply the following skills:

- Write a grading system philosophy that accommodates all students fairly
- Implement differentiated instructional models such as scaffolding, tiering, and flexible grouping
- Begin an ongoing dialogue with colleagues about assessments and grade book commonalities, revisions of standards, and flexibility in assessment techniques
• Be willing to courageously evaluate mindset to accommodate new techniques in teaching and grading practice in order to put each student’s learning first

Text: “Movin’ Up to the Middle”

Participants read “Movin’ Up to the Middle,” by Rick Wormeli (ASCD: April 2011), and respond to a reflection prompt.

Unit 1: Preparing Educators for Differentiated Instruction

Differentiated instruction requires courage and commitment from educators. In this unit, Rick Wormeli introduces the elements necessary to create differentiated classrooms. And he asks important questions of his audience. Do they have the willingness, for example, to learn about and teach to students’ individual learning profiles, to meet all students’ needs, and to organize classrooms for students’ learning rather than for teachers’ teaching?

Unit Objectives

After completing this unit, educators will know:

• A working definition of differentiated instruction
• How to engage in the essential stages of differentiated instruction
• The level of commitment necessary to teach in a differentiated classroom

Student Learning Outcomes

After completing this unit, educators will be able to:

• Reframe their mindset and teaching practice to accommodate individual learners
• Implement strategies to move their classrooms toward differentiation

Unit 2: Accommodating Learning Profiles through Assessment and Strategies in DI

Rick Wormeli challenges participants to view assessment through new eyes. Fair is not equal in terms of assessment, he argues. Participants learn what steps to take before, during, and after learning experiences to assure that their students are getting a fair education. They analyze the roles of pre-, formative, and summative assessments in differentiated instruction and study practical tips for planning, developing, and administering assessments most effectively in the DI classroom.

Unit Objectives

After completing this unit, educators will know:

• The roles of pre-, formative, and summative assessments in differentiated instruction
• How to plan, develop, and implement appropriate assessments in a differentiated classroom

**Student Learning Outcomes**

After completing this unit, educators will be able to:

• Make changes to the classroom culture that allows for acceptance of differences
• Create assessment tools that accommodate differentiated instruction
• Utilize new formats in grading that accommodate different assessment tools
• Develop differentiated instruction plans within their core curriculum

**Unit 3: Implementing Essential Principles and Strategies of Differentiated Instruction**

Educators who differentiate instruction must recognize that no two students are exactly alike. In this unit, participants learn strategies which will allow them to know each of their students well, so they can differentiate content, process, product, affect, and learning environment for students. Rick Wormeli introduces participants to essential principles of differentiated instruction so that they can use assessment to inform instruction. They learn how to design and use instructional models such as flexible grouping, scaffolding, and tiered lessons that accommodate students’ unique needs.

**Unit Objectives:**

After completing this unit, educators will know:

• Essential principles of differentiated instruction
• The importance of assessment tools in creating student profiles
• Where to find the essential research and tools for creating a DI classroom

**Student Learning Outcomes**

After completing this unit, educators will be able to:

• Differentiate instruction (content, process, product, affect, and learning environment) according to students’ learning profiles, readiness, and interest
• Select and use assessment tools to inform instruction

**Text: “Differentiating for Tweens”**

Participants read “Differentiating for Tweens,” by Rick Wormeli (*Educational Leadership*: April 2006), and respond to a reflection prompt.
Unit 4: Creating a Fair and Relevant Grading System in the Differentiated Classroom

Most grading systems are arbitrary, nonsensical, and even destructive, Rick Wormeli argues. He challenges participants to assess whether their grading systems are norm-referenced or criteria-referenced, as they should be. In this unit, educators learn to reconsider their systems and redesign them to avoid subjectivity. Participants will focus on distinguishing the roles of formative and summative assessment in helping students strive for and attain authentic mastery.

Unit Objectives

After completing this unit, educators will know:

- Why most grading systems—as distinct from ungraded feedback—are in conflict with differentiated instruction
- How to authentically assess mastery of content

Student Learning Outcomes

After completing this unit, educators will be able to:

- Design a new grade book system that takes into account task analysis as well as objective assessments
- Focus on feedback as a critical road to mastery
- Develop benchmarks and standards of learning with subject colleagues using nationally recognized experts in the field
- Implement a criteria-referenced grading system with colleagues

Unit 5: Exactly What, When, and How to Grade in a Differentiated Classroom

In this unit, Rick Wormeli asks educators to reconsider the role of grades and how grades can work when they provide feedback, document progress, and guide instructional decisions, but generally don’t work when their goal is to motivate, punish, or sort students. He demonstrates how to teach, reserving grades for only summative rather than formative experiences. Participants study a list of grading practices to avoid in a differentiated classroom. This unit gives educators a sound understanding of how to use assessment as communication rather than compensation.

Unit Objectives

After completing this unit, educators will know:

- When and how to test students in a differentiated classroom
- How assessments impact student success and motivation
- The importance of formative feedback in the learning process

Student Learning Outcomes

After completing this unit, educators will be able to:
- Create a school-wide standard of “mastery” within subject curricula
- Implement a fair grading structure for the classroom that takes into account differentiated instruction and assessment
- Develop a revised grade book that includes all aspects of student performance, including effort, attendance, attitude, and participation and a separate area for assessed mastery of the subject area

Unit 6: Designing Grades as Instructive Instruments in a Differentiated Classroom

Grades should be neither punishment nor reward. Rick Wormeli challenges participants to fully embrace that grades—not just feedback—should always be instructive instead of punitive. He further challenges participants to critique their own use of the A-F, or 100 point grading system, percentages, and averages.

Mr. Wormeli discusses such practicalities as how to deal with students’ late work and whether and when to allow re-do as well as how to give grades to struggling and exceptional students.

Participants learn the importance of writing grading philosophy statements that will help them clarify their policies to themselves, their students, to parents, and administrators. This unit dramatically reinforces the notion that in a differentiated classroom, fair is not equal.

Unit Objectives

After completing this unit, educators will know:
- The current research about fair grading and where to access additional resources
- The problems inherent in the 100 point, averaging and curve systems of grading
- The true purposes of grading and how to achieve those goals

Student Learning Outcomes

After completing this unit, educators will be able to:
- Use grades instructively instead of punitively
- Write a grading philosophy statement
- Create “tiering” within differentiated instruction

Text: “Busting Myths about Differentiated Instruction”

Participants read “Busting Myths about Differentiated Instruction,” by Rick Wormeli (Principal Leadership: March 2005), and respond to a reflection prompt.
Text: “Barriers to Implementing Differentiation: Lack of Confidence, Efficacy, and Perseverance”

Participants read “Barriers to Implementing Differentiation: Lack of Confidence, Efficacy, and Perseverance,” by VJ Hawkins (New England Reading Association Journal: 2009), and respond to a reflection prompt.

Presenter’s Bio

Rick Wormeli is a Nationally Board Certified Teacher and a columnist for NMSA’s magazine, Middle Ground. He is also the author of Meet Me in the Middle: Becoming an Accomplished Middle Level Teacher and Day One and Beyond: Practical Matters for New Middle Level Teachers. Rick won the outstanding English Teacher of the Nation Award at Disney's American Teacher Awards in 1996. He has been a consultant to both the White House and the Smithsonian Institution.

Methods of Instruction

- Videos (presentations consisting of lecture, interviews, and classroom footage)
- Text (units based on required reading)
- Reflection questions (open-ended questions at the end of the video presentations where participants are asked to reflect on the course content, their own practice, and their intentions for their practice)
- Quizzes (selected-response quizzes to assess understanding of the video presentations)
- Discussion Forums (prompts after each unit that engage participants in online dialogue with their cohorts)
- Midterm (a project intended to get teachers to begin to develop their practice by putting to work what they have learned)
- Final (a project that enables educators to reflect on their practice and assess their students’ work through the lens of what they have learned)

In order to complete the requirements of the course, the participant must complete all course work (e.g., reflections, quizzes, and any midterm and/or final), including watching all videos and participating in all discussion forums. We do not award partial credit.

Percentage of Course Credit

- Reflection questions 25%
- Quizzes 15%
- Midterm 25%
- Final 35%
Plagiarism Policy

KDS recognizes plagiarism as a serious academic offense. Plagiarism is the passing off of someone else’s work as one’s own and includes failing to cite sources for others’ ideas, copying material from books or the Internet (including lesson plans and rubrics), and handing in work written by someone other than the participant. Plagiarism will result in a failing grade and may have additional consequences. For more information about plagiarism and guidelines for appropriate citation, consult plagiarism.org.

Midterm

Develop a lesson plan from scratch (!) with 2-3 embedded activities that enables you to differentiate for students’ different skills, learning styles, or readiness levels. Your lesson plan should include clear objective(s), align to an identified standard (e.g., from the Common Core State Standards or elsewhere), and provide opportunities for both independent and small-group work.
Please do the following:

1. Identify to which standard your lesson aligns.
2. Identify learning objective(s).
3. Incorporate 2-3 different activities differentiated for one of the following:
   a. Students’ different skills
   b. Students’ different learning styles
   c. Students’ different readiness levels
4. Ensure that students have opportunities for both independent and collaborative work.

| Participant has organized most paragraphs around clearly articulated main ideas. |
| Participant has written in an effective and eloquent style—i.e., has varied his or her sentence structure though not always found the right word. |

| Participant has made multiple grammatical errors. |
| Paragraphs are not organized around main ideas. |
| Participant has written in a style that does not effectively communicate his or her thoughts. |

Final

Using the lesson plan you developed for your midterm, develop 2 assessment tools: one for pre-assessment and one that can serve for both formative assessment while students are working and summative assessment of students’ final products (e.g., written work, performances, presentations, etc.). The latter tool should be a fully realized rubric with appropriate categories and descriptors.

Please do the following:

1. Reiterate the learning objectives from your midterm.
2. Develop and present a pre-assessment tool you could use to discern student need.
3. Describe the final product(s) students were supposed to produce from the midterm lesson plan.
4. Develop and present a formative and summative assessment tool to use to inform their progress and evaluate their final products.
5. Explain how you would move from your formative/summative assessment tool to determining grades.
## Final Rubric

<table>
<thead>
<tr>
<th>Step</th>
<th>Distinguished (4)</th>
<th>Proficient (3)</th>
<th>Basic (2)</th>
<th>Unsatisfactory (1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reiterate the learning objective(s) from your midterm.</td>
<td>Participant has reiterated the learning objective(s) developed for the midterm.</td>
<td></td>
<td></td>
<td>Participant has not reiterated the learning objective(s) developed for the midterm.</td>
</tr>
<tr>
<td>Develop and present a pre-assessment tool you could use to discern student need.</td>
<td>Participant has developed a purposeful pre-assessment tool to discern student need in relation to readiness, learning style, or skills. The tool will clearly provide enough information to inform the participant’s instructional design.</td>
<td>Participant has developed a pre-assessment tool to discern student need in relation to readiness, learning style, or skills.</td>
<td>Participant has developed a pre-assessment tool, but its functionality as a tool to discern student need is in question.</td>
<td>Participant has not developed a pre-assessment tool.</td>
</tr>
<tr>
<td>Describe the final product(s) students were supposed to produce from the midterm lesson plan.</td>
<td>Participant has described in full detail a final product(s) that is challenging, engaging, and will clearly enable the student to indicate what he or she now knows or is able to do as a result of the lesson.</td>
<td>Participant has described in some detail a final product(s) that will enable the student to indicate what he or she now knows or is able to do as a result of the lesson.</td>
<td>Participant has indicated the final product(s), but whether they will indicate what a student now knows or is able to do as a result of the lesson is in question.</td>
<td>Participant has not indicated a final product.</td>
</tr>
<tr>
<td>Develop and present a formative and summative assessment tool to use to inform their progress and evaluate their final products.</td>
<td>Participant has developed and presented a precise and purposeful assessment tool to use that would clearly provide information to students that would inform (and improve) their progress and work.</td>
<td>Participant has developed and presented an assessment tool that would likely provide information to students that would inform (and improve) their progress and work.</td>
<td>Participant has developed and presented an assessment tool that would serve <strong>either</strong> to inform students’ progress <strong>or</strong> as an evaluative tool for final products.</td>
<td>Participant has not developed and presented an assessment tool to serve as both formative and summative assessment.</td>
</tr>
<tr>
<td>Explain how you would move from your formative/summative assessment tool to determining grades.</td>
<td>Participant has convincingly explained, with appropriate detail, how he or she would move from the formative/summative assessment tool to determining fair and informative grades.</td>
<td>Participant has explained how he or she would move from the formative/summative assessment tool to determining grades.</td>
<td>Participant has tried to explain how he or she would move from the formative/summative assessment tool to determining grades, but the system he or she is describing may not result in fair and informative grades.</td>
<td>Participant has not tried to explain how he or she would move from the formative/summative assessment tool to determining grades.</td>
</tr>
<tr>
